

SHEET VINYL MAINTENANCE INSTRUCTIONS

Initial Maintenance

- Sweep, vacuum, or dust mop to remove dirt and grit.
- If needed, add neutral pH cleaner to cool water following the cleaner manufacturer's instructions.
- Scrub with a low-rpm machine or auto scrubber. Use a red pad or brush.
- Never use brown or black pads (they are too aggressive and can damage the product).
- Remove the cleaning solution with a wet-dry vacuum or auto scrubber until the floor is dry.
- Rinse the floor with clean water. Repeat the rinse process if necessary.

Routine Maintenance

- Sweep, vacuum, or dust mop to remove dirt and grit.
- Add neutral pH cleaner to cool water following the cleaner manufacturer's instructions.
- As needed, scrub with a low-rpm machine or auto scrubber to retain appearance. Use a red (light scrubbing) pad and neutral cleaner following the cleaner manufacturer's instructions.

Preventative Floor Care

- Use walk-off mats that have a non-staining backing. Make sure they are wide enough to capture all foot traffic and long enough for soil loading and weather conditions. Floor protectors should be used on all furniture legs.
- The surface area of the floor protectors should be no less than 1" in diameter.

If additional information is required, please contact FloorFolio at 1-800-671-1124.
